WORK EXPERIENCE

Full Stack Developer | Oct, 2017 - Now

[Play.ht](#) - Remote Job

Stack: Nodejs - Reactjs - IBM Watson/AWS Polly/Google TTS - Firebase

Roles: - Maintaining a Text To Speech server which talks to IBM Watson and Amazon Polly, and adding new features to it.

- Building and maintaining a chrome extension for Medium writers helping them adding audio to their articles from the Medium editor and from the public stories page, which includes a typing checker for misspelled words and for things like heteronyms.
- Writing scripts and patches to fix and maintain the servers and to keep the data consistent.
- Building SSML editor based on slatejs, to enable users to have more control over the output audio.
